## Part A – Motivation Report

### 1. Introduction

Welcome to the Sondal Community Improvement District (CID) initiative, a forward-thinking project aimed at transforming our beloved neighbourhood into a safer, cleaner, and more vibrant community. The establishment of the Sondal CID marks the beginning of an exciting journey towards significantly enhanced public safety, park facilities, and urban and environmental management.

Our journey begins with a commitment to improving public safety. Over recent years, our neighbourhood has faced increasing challenges related to crime and vagrancy. By establishing the Sondal CID, we aim to implement robust measures such as dedicated 24/7 patrolling, constant advanced surveillance system monitoring, and strong partnerships with local law enforcement. These efforts are designed to create a secure environment where families can thrive and children can play freely.

The various neighbourhood watches have relied on volunteers to do patrols and only a few residents have contributed financially. The deployment of new technologies has brought about an increased administrative burden for those residents involved with the neighbourhood watch processes to ensure cameras are functional, engaged, maintained and that incident footage reviewed. The days of just needing to do a patrol every few weeks are over. This approach has become unsustainable and unaffordable for the few contributing residents and, without a new plan, we risk the deterioration of the safety of our public areas.

In addition to safety, maintaining the cleanliness and attractiveness of our area is paramount. The Sondal CID will facilitate regular cleaning and maintenance of public spaces, ensuring that parks, playgrounds, and streets are well-kept and inviting. Our collaboration with the City will enhance these services, contributing to an improved quality of life for all residents.

A key focus of our plan is the improvement of infrastructure around our parks and green spaces. We recognize the importance of these areas as vital community hubs. The Sondal CID will work to upgrade and beautify parks by installing new walkways, benches, solar lighting, and cycle tracks for children. We will ensure that playgrounds are safe and enjoyable for children and that green spaces are preserved and enhanced for recreational use. These enhancements will make our parks more accessible and enjoyable.

A CID (City Improvement District) provides the funding mechanism and structure to improve services in a defined area. Once established, the CID enables property owners to become involved in the management of their own area by collecting funds through the City’s billing system through additional rates. The money is transferred to a non-profit company controlled by the property owners, which enables the CID to augment services provided by the City. The non-profit company receives a mandate from the property owners on supplemental municipal services and infrastructure desired for the area.

In accordance with the relevant by-laws and policy of the City of Cape Town (the “City”):

- The Steering Committee met with relevant City officials to register itself and confirm the boundaries of the proposed CID.
- The City confirmed that all members of the Steering Committee are in good standing with the City and that the rates collection ratio for properties within the boundaries of the proposed CID exceeds 95% over the past 12 months.
- City provided the Steering Committee with a database of ratepayers in compliance with the Protection of Personal Information Act.
- An Urban Management Survey (UMS) was compiled by the Steering Committee and approved by the City. This urban management survey is a study completed with the goal of collecting opinions and concerns about various issues, the results of which inform the steering committee as to what residents and visitors think of public safety and other matters. This type of data is critical to helping the steering committee to understand the area’s strengths and weaknesses and identifies focus areas where services and projects are required to supplement municipal services.

## 2. Name of the Proposed CID

The proposed name of the CID is **Sondal Community Improvement District** (Sondal CID). The name was derived from the combination of two suburbs names in the area - Sonstraal and Eversdal.

### 3. The Applicant

The applicant is the chairperson of the Sondal CID Steering Committee, **Julian van Zyl**. Delivery of any notices to the applicant may be emailed to [info@sondal-cid.org](mailto:info@sondal-cid.org).

The Steering Committee members are as follows:

- Julian van Zyl (Chairperson)
- Louise du Toit
- Lourens van Dyk
- Jacques Nolte
- Ian Bartes
- Hein Hanekom

Apart from the members noted above, the following individuals also contributed extensively:

- Stefan Buys
- Louise Buys
- Pierre Burden
- Ada Esterhuysen

The vision, mission and goal for the Sondal CID is:

**Vision:** A community striving to maintain a safe, clean and attractive neighbourhood.

**Mission:** Enabling the community to be involved in the management and improvement of our area.

**Goal:** The goal is to improve the public safety in our area; to clean, maintain and improve the public areas in collaboration with the City; and to address social issues by supporting social upliftment programmes/initiatives.

## 4. Defined Area of the CID

The geographical area of the proposed Sondal CID is illustrated on the map below (Valmary Park, Vygeboom, Sonstraal, Amanda Glen, and a portion of Eversdal and Eversdal Heights).

- The western boundary is Durban Road
- The southern boundary is Eversdal Road
- The eastern boundary is the Kuils River corridor adjacent to Fairtrees Road
- The northern boundary wraps around the Durbanville Golf Course and extends up Van Der Byl Avenue towards Durban Road

## 5. Strategic Objectives

The strategic objectives of Sondal CID are focussed on enhancing public safety and security, maintaining and cleansing the area, promoting environmental development, and fostering social and economic development in an environmentally sustainable manner.

### **To improve public safety:**

Improving public safety is a key objective of the Sondal CID, which aims to enhance the safety of the area by implementing robust measures to deter crime and improve the response to emergencies. These measures include:

- 24/7 visible patrolling with CID-branded vehicles
- Advanced surveillance systems – deployment of CCTV cameras monitored by a 24/7 Control Room
- Strong partnerships with local law enforcement agencies
- Appointment of an officer under the Law Enforcement Advancement Plan exclusively to service the Sondal CID
- Assist the police through participation in the local Police sector crime forum, as well as the CPF

These strategies aim to enhance public safety in the Sondal CID area by improving visibility, communication, and collaboration between public safety bodies, residents, and employees, as well as increasing the use of technology to monitor and respond to public safety incidents.

### **Maintenance and Cleansing of the area:**

The Sondal CID is dedicated to fostering a clean, attractive, and well-maintained district. This initiative supports broader city goals for improved quality of life. The CID aims to ensure:

- Regular cleaning and maintenance of the area and ensuring public areas are clean, safe and well maintained for residents and visitors.
- Collaboration with the City to improve maintenance and cleansing services.

### **Environmental development, including but not limited to beautifying and upgrading public areas and facilities:**

The Sondal CID recognises the importance of environmental development, especially in relation to the dams and nature areas within its boundaries. To achieve this, the CID proposes several strategies, including:

- Conservation and enhancement of green areas: Aims to preserve and enhance the natural beauty of the parks, dams and other nature areas, and to ensure biodiversity.
- Upgrading of facilities in our parks and other nature areas based on the outcome of community engagement.
- Partnership with local authorities and organisations: Ensure that environmental initiatives are aligned with broader city-wide goals and strategies. It will involve regular communication and collaboration, as well as the sharing of resources and expertise.
- Establish strategic partnerships with local NGOs that are already doing work to beautify and upgrade the area.
- Monitoring and evaluation of the success of its environmental initiatives, using data and feedback from the community to inform future strategies and actions.

### **Promoting social and economic development:**

The Sondal CID is committed to fostering a supportive environment that enhances both social and economic development within the district by reducing homelessness, improving local services, and creating employment opportunities, especially for vulnerable populations. To achieve this, the CID will:

- Establish strategic partnerships with local NGOs, community groups, and the city's social services departments. These collaborations aim to address pressing social issues such as homelessness and unemployment through comprehensive community-driven strategies while ensuring that the Sondal CID benefits from these partnerships.

## 6. Core Values

### **Transparency**

Submission of annual reports to the local community, encouragement of local community participation in board meetings and members' meetings of the Sondal CID non-profit company, and publication of relevant documentation online.

### **Accountability**

The Sondal CID will employ professional, experienced management who will be accountable through the Board to the community and to the City for the delivery of the agreed plan. Management of the CID will also be required to hold the City accountable for the continuing provision of the base level services upon which this Business Plan relies.

### **Value for money service delivery**

Given the substantial budget that the community entrusts to the Sondal CID, it will strive to deliver the best value-for-money services through transparency, strong financial controls and always negotiating with suppliers for the best possible services at reasonable and market-related prices.

### **Collaboration**

The Sondal CID will partner with other organisations working towards the same goals such as existing community organisations, NGOs and the City.

## 7. Why the Area Needs a CID

Despite “best effort” attempts by neighbourhood watches and armed response companies, housebreaking, burglary and petty crime remain common in the neighbourhood, along with increasing vagrancy, substance abuse and the social and other accompanying problems.

Responding to crime in the area has required leaps in the advancement of solutions required, specifically the rollout of human detection and license plate recognition cameras. With the increasing incidence of crime, it is not possible to manage crime without these solutions, but unfortunately the added time commitment required from a small group of community volunteers that arrange camera installations, maintain the camera network, problem-solve alerting issues, review footage and – importantly – respond to alerts of the 115 existing cameras in the area is unsustainable. It is also unsustainable for a minority of residents to cover the continuing costs.

A CID is the only sustainable way for the response to crime in our area to continue over the long-term, as there is a significant risk of existing volunteers ultimately withdrawing their services over time as the commitment required becomes increasingly onerous.

Notwithstanding the public safety focus, CID establishment provides significant further opportunities to increase the desirability of the area through additional projects around our green areas and enhanced and supplementary services to improve on the existing municipal services.

### Why a CID?

- Improves and upgrades areas through sustainable urban management and projects
- Enhances and supplements existing municipal services driven by community feedback
- Creates safe, clean, socially responsible and sustainable environments
- Halts any degeneration and facilitates upliftment of lower priority areas
- Promotes economic growth and sustainable development
- Leads to increased desirability of the area
- Facilitates a co-operative approach between the City and private sector

Benefits of a CID	
01 	<b>Improved Infrastructure</b> Upgrading and maintaining infrastructure within the CID boundaries. This can include road improvements, sidewalks, street lighting, landscaping, and more, leading to safer and more attractive public spaces.
02 	<b>Enhanced Public Safety</b> Security measures such as increased police presence, security cameras, and private security patrols, thereby helping to reduce crime rates and create a safer environment for residents and visitors.
03 	<b>Beautification and Aesthetics</b> Beautification efforts such as landscaping, public art installations and other improvements which can enhance the overall appearance and attractiveness of the area.
04 	<b>Increased Property Values</b> Property values within the CID boundaries may rise as a result of the improved amenities and services provided by the CID.
05 	<b>Stronger Sense of Community</b> CIDs foster a sense of community pride and ownership, as residents work together to improve their shared environment.
06 	<b>Local Control and Decision-making</b> CID is managed by a board of directors consisting of residents/property owners within the CID, giving the community more direct control over how funds are used and what projects are prioritized.
07 	<b>Funding for Special Projects</b> CIDs have the ability to finance projects that might not otherwise receive public funding.
08 	<b>Flexibility and Adaptability</b> CIDs can respond more quickly to local needs and issues compared to traditional government agencies, allowing for more agile and customized solutions.

## 8. Urban Management Survey

An Urban Management Survey was conducted with the aim of collecting vital insights from property owners regarding the four categories of strategies objectives. The results of the survey were used as the basis to compile this Business Plan and guide the allocation of funding.

The UMS was conducted online at <https://sondal-cid.org/>, with invitations to complete the survey distributed via community Whatsapp groups, emails to all email addresses (13 October 2023) on the property database provided by the City as well as a newspaper article in the Tygerburger (18 October 2023). The survey remained open for completion from 21 September 2023 to 3 November 2023. Regular reminders were posted on various community WhatsApp groups.

The survey indicates a positive perception and satisfaction among residents regarding the area. The residents are happy to stay in the area and there is no overwhelming desire to leave the area. The area is also seen as a generally welcoming area that is well maintained. There is also a general perception that the municipal services in the area are fair to good.

The perception of overall safety in the neighbourhood ranges from fair to good. **Approximately 55% of respondents reported either being victims of crime themselves or knowing someone in the area who has been a victim.** Notably, 86% of respondents have invested in improving their private security, which is clearly noticeable when walking through the neighbourhood.

A concern is that 60% of the respondents who view the general safety in the area to be good (when walking through the area unaccompanied) would not allow their children to roam the streets or walk to school unaccompanied. This is indicative of their true concern regarding the public safety situation. Children are generally confined to their own homes. This is in fact noticeable when walking through the area. If the children are outside their parents are often close by.

Homelessness was found to be a significant concern amongst the respondents. Some 85% of the respondents indicated it to be a concern. **A very high percentage (99%) of respondents indicated that the presence of homeless loitering contributes to crime and harassment as well as a decrease in cleanliness in the area.**

The majority of respondents (86%) indicated that they make use of the parks including Vygeboom & Sonstraal dam for recreational purposes. A significant 72% of respondents feel that the amenities around the parks including Vygeboom & Sonstraal

dam can be improved. When asked if they would make use of a bike park in the area, 55% indicated they would. 56% of respondents indicated there is not sufficient public litter bins in the area and that public litter bins are not cleaned out regularly.

A majority of respondents (78%) support the establishment of a City Improvement District, citing the need for enhanced safety and supplementary municipal services. Only 8% of respondents opposed the establishment, while 14% were neutral. This strong support underscores the community's desire for a CID to address their concerns and improve overall quality of life.

## Support for a Community Improvement District based on the Urban Management Survey

The survey was completed by 421 respondents – where two or more people at the same address completed the survey the duplicates were removed bringing the total to 397 responses. 4.8% of the 397 responses were from a random sample of people living outside the area, but passing through often, bringing the total responses from residents down to 378. Of the 378 responses from residents 92.6% were from property owners, 2.1% from owner representatives and 5.3% were from residents renting a property in the area. 28.8% of residents have been living in the area for more than 20 years; 28.3% of residents have moved into the area during the last five years; and the remainder between 5 to 20 years.

**The results of the Urban Management Survey are available on the Sondal CID website (<https://sondal-cid.org/>)**

## 9. Improving Public Safety

Public safety is paramount in Sondal CID. Our approach is to integrate state-of-the-art technology, community involvement, and proactive measures to prevent crime and enhance safety for all residents and visitors. As a community, we can't burden the task of ensuring our area's safety to just a handful of people (NHW & voluntary contributions) and rely solely on armed response's free and 'best efforts' support. This model is unsustainable and unreliable since those involved have family and work priorities that take precedence to their desire to assist the community. A serious effort must be made to secure dedicated, trained, 24/7 support to look after our area's security. A significant portion of the Sondal CID budget will be allocated to public safety, ensuring adequate funding for personnel, technology upgrades, and new initiatives. The effectiveness of public safety measures will be continuously assessed through community feedback, incident reports, and performance analytics. Strategies will be adjusted as needed to address emerging challenges and ensure the safety of the Sondal CID community.

Whether we live in one of the many estates in the area, or in a freestanding home, we all want to move around freely and without fear when walking our dogs, taking a jog or cycle, or having a stroll around the dams and other green areas.

### a. Proposed Services and Projects

Proposals for Improving Public Safety are:

#### **Core service: 24 Hour Armed Patrolling of public spaces and engagement on camera alerts**

- a) Visible patrolling of public spaces and engaging suspicious persons and vehicle alerts from LPR & HD cameras by trained Public Safety Officers.
- b) Two CID-branded staffed patrol vehicles will always be in the CID area – 24 hours per day. They will primarily be reactive to camera alerts from the control room, but will also patrol the entire area.
- c) Public Safety Officers will be in direct contact with the control room with dedicated controllers to assist them. The officers will work in three 8-hour shifts per day and wear CID-branded uniforms.
- d) The control room/centre ensure rapid response and coordination with the public safety officers, law enforcement and SAPS.

- e) Park wardens will also contribute towards parks & open spaces safety as extra eyes to report suspicious activities to the control room.

**Core service: Dedicated LEAP Officer 5 days a week**

- a) Contracting a dedicated law-enforcement officer to work exclusively within the Sondal CID area and accompanying the Public Safety Officer in a vehicle. The officer will work a daytime shift on weekdays.
- b) With the necessary mandates the LEAP officer can stop and search suspect persons and vehicles, as well as attend to illegal settlements in the green belts, specifically below Fairtrees.
- c) The officer will also enforce the city by-laws and ensure taxi routes are adhered to.

**Project: Expansion of camera infrastructure**

- a) Expanding CCTV coverage using high-definition cameras and license plate recognition (LPR) technology to monitor public spaces and roads.
- b) There are currently 115 cameras in the proposed CID area that needs to be maintained and replaced at the end of their approximately 5-year lifespan. These include LPR & HD cameras.
- c) An additional 85 cameras are proposed to ensure better tracking and monitoring of suspicious persons and vehicles.
- d) Adding UPS systems to existing LPR cameras, as criminals have learned to take advantage of power outages.

**Core service: Maintenance of camera infrastructure and monitoring**

- a) The camera network will be integrated into a central control room for real-time monitoring and incident response.
- b) Contracting service providers to ensure cameras are maintained, online, sending alerts and kept cleared of obstructions like growing branches.

**Project: Fencing at accessible areas into the community**

- a) Fencing will be erected along boundaries where wide open spaces provide access for pedestrians to the proposed CID area undetected. The purpose will be to channel the pedestrians to an access point where a Human Detection camera will detect the entry and if needed be engaged upon by the Public Safety/Law-Enforcement Officer. Fences will have gates that can be locked and unlocked at specified times of each day to ensure equitable access.

## b. Area Within the Proposed Boundaries of the Sonal CID

This proposal covers the following:

- Road reserves (covers entire area)
- Parks and playgrounds (all public open spaces)
- Sonstraal Dam and Vygeboom Dam
- The Kuils River corridor

**d. Allocation of Resources**

All areas of the Sondal CID will be served on an equal basis. Security patrols will cover the entire area and respond to incidents reported across the entire area.

**e. Alignment with the Municipality’s IDP and with Section 22(4) of the MPRA**

The Safety sections of this plan are consistent with the municipality's IDP (2022-2027 edition) and with section 22(4) of the Local Government: Municipal Property Rates Act, No. 6 of 2004 (the "MPRA") as shown in the table below.

IMPROVING PUBLIC SAFETY			
CID PROGRAMMES	IDP PRIORITIES/FOUNDATION	IDP OBJECTIVES	IDP PROGRAMMES
Public Safety	TOP TIER PRIORITY: <b>SAFETY</b>	OBJ 5: Effective law enforcement to make communities safer	5.1 Enhanced policing programme
			5.2 Safety technology programme
Public Safety	TOP TIER PRIORITY: <b>SAFETY</b>	OBJ 6: Strengthen partnerships for safer communities	6.1 Partnerships for community safety programme
			6.2 Holistic crime prevention programme

## 10. Maintenance and Cleansing

The outcome of the urban management survey indicated that Maintenance and Cleansing is the 2<sup>nd</sup> most important issue raised by residents after Safety and Security. The objective for Maintenance and Cleansing is to supplement municipal services in order to ensure that the subject area is a clean, attractive and well-maintained area. We aim to achieve this by collaborating with residents, other non-profit organizations and contractors to provide services that align with the City's programmes for maintenance and cleansing.

### a. Proposed Services

Proposals for Maintenance and Cleansing are:

A team of four cleaning staff wearing CID uniforms, accompanied by a utility vehicle, will perform the majority of the functions outlined below during daytime shifts on weekdays.

In addition, **three park wardens** wearing CID uniforms will be employed for daytime shifts on weekdays to ensure the public parks and areas around the dams in the area are always clean and to maintain the vegetation.

#### Core service: Road Reserves

- a) Develop and implement a street cleaning program for the road reserves in the area
- b) Regular street sweeping/cleaning of main roads
- c) Sweeping/cleaning of other roads on a continuous basis around the area, dependant on priority of need.
- d) Cleaning storm water gullies (removal of leaves and other litter blocking grids and inlets) to prevent flooding and ponding – if/where required
- e) Trimming of branches to improve sight distance
- f) Removal of weeds in road verges where there is no abutting owner to maintain the verge

#### Core service: Parks and Playgrounds (Public open spaces)

- a) Litter picking on each weekday and removal of waste at least weekly
- b) Grass cut more frequently in spring and summer as required
- c) Removal of illegal dumping as required

<b>Core service: Bus stops and other areas used as shelters</b>	
a)	Weekly cleaning and removal of waste
b)	Install more waste bins if required
c)	Enhance signage regarding littering
<b>Core service: Sonstraal Dam and Vygeboom Dam</b>	
a)	Litter picking on each weekday and removal of waste at least weekly
b)	Install more waste bins
c)	Enhance signage regarding littering
<b>Core service: The Kuils River Corridor</b>	
a)	Litter picking as required – special clean-ups will be arranged in conjunction with NGOs.
b)	Removal of illegal dumping as required
<b>Core service: Infrastructure Maintenance</b>	
a)	Monitor the upkeep of public infrastructure such as roads, sidewalks, and lighting, and hold the City accountable if relevant standards are not maintained.
b)	Temporary repairs of potholes/damage to roads and sidewalks in the interest of safety of residents. Memorandum of Agreement to be signed between the CID and the City's Road Infrastructure Management Department. In terms of the agreement the City may provide material to the CID to temporarily repair/fill potholes and gives permission to the CID to work in the roadway.
c)	Engage with City line departments regarding service issues reported by residents (such as overflowing manholes or flooding) and requests from the community (such as traffic calming).

**b. Area Within the Proposed Boundaries of the Sondal CID**

This proposal covers the following:

- Road reserves (covers entire area)
- Parks and playgrounds (all public open spaces)
- Sonstraal Dam and Vygeboom Dam
- The Kuils River corridor

- Bus stops and other areas used as shelters

### c. Total Estimated Costs of These Services and Projects

	2026/27	2027/28	2028/29	2029/30	2030/31

### d. Allocation of Resources

All areas of the Sondal CID will be served on an equal basis by all the Maintenance and Cleansing services to the extent that the services in question are relevant. The allocation of resources for cleaning of the area around the Sonstraal and Vygeboom dams can be justified as residents from across the area utilize the dams for recreational purposes (exercising, walking dogs or leisurely walks).

### e. Alignment with the Municipality’s IDP and with Section 22(4) of the MPRA

The Maintenance and Cleansing sections of this plan are consistent with the municipality’s IDP (2022-2027 edition) and with section 22(4) of the Local Government: Municipal Property Rates Act, No. 6 of 2004 (the “MPRA”) as shown in the table below.

			11.2 Partnerships for quality public spaces programme

## 11. Environmental Development

The Sondal CID is dedicated to fostering a clean, attractive, and well-maintained district, emphasizing environmental sustainability and efficient urban management. This initiative supports broader city goals for improved quality of life.

### a. Proposed Services and Projects

Proposals for Environmental Development are:

<b>Project: Green belt connection project and green spaces upgrades</b>	
a)	Establish walking route by adding walkways (missing links) in collaboration with the City of Cape Town.
b)	Install benches along walkways that will connect the four main greenbelt areas in the Sondal CID
c)	Design a tree planting plan for trees to be planted along walkways
d)	Tree planting and maintenance
e)	Children's cycle track in Year 4
f)	Seating/Picnic benches on platforms around dams
<b>Core service: Green spaces and Recreation</b>	
a)	Enhance local parks, playgrounds, and green spaces to provide safe and engaging recreational areas
b)	Increase green bin allocation
c)	Weed control along walkways and at green belt areas bi-annually
d)	Park wardens employed to ensure public spaces are always well kept. Refer to Section 10 for further details regarding park wardens.
d)	

## b. Area Within the Proposed Boundaries of the Sondal CID

## d. Allocation of Resources

All areas of the Sondal CID will be served on an equal basis to the extent that the development/maintenance in question are relevant. The allocation of resources around the Sonstraal and Vygeboom dams and associated green belt can be justified as residents from across the area utilize the dams and green belt for recreational purposes (exercising, walking dogs or leisurely walks).

**e. Alignment with the Municipality’s IDP and with Section 22(4) of the MPRA**

The Environmental Development and Urban Maintenance sections of this plan are consistent with the municipality's IDP (2022-2027 edition) and with section 22(4) of the Local Government: Municipal Property Rates Act, No. 6 of 2004 (the “MPRA”) as shown in the table below.

ENVIRONMENTAL DEVELOPMENT			
CID PROGRAMMES	IDP PRIORITIES/FOUNDATION	IDP OBJECTIVES	IDP PROGRAMMES
Urban Development	SECONDARY TIER PRIORITY: <b>TRANSPORT</b>	OBJ 13: Safe and quality roads for pedestrians, cyclists and vehicles	13.1 Road Safety and Maintenance programme

**12. Promotion of Social and Economic Development**

The Sondal CID is committed to fostering a supportive environment that enhances both social and economic development within the district. This commitment includes initiatives aimed at reducing homelessness, improving local services, and creating employment opportunities, especially for vulnerable populations. Sondal CID will establish strategic partnerships with local NGOs, community groups, and the city's social services departments. These collaborations aim to address pressing social issues such as homelessness and unemployment through comprehensive community-driven strategies.

**a. Proposed Services and Projects**

Proposals for Social and Economic Development are:

<b>Core service: Crime Prevention and Community Safety: Reduce drug- and alcohol-related crime, anti-social behaviour, accidents, and injuries.</b>	
a)	Collaborate with law enforcement, NGOs and community organisations to enhance responses to alcohol and drug-related issues
<b>Core service: Collaborative Partnerships: Promote collaboration with other organisations</b>	

a)	Establish partnerships with local NGOs and community groups to address social challenges collectively and create employment opportunities.
b)	Support local NGOs that make a difference in the local community (eg. MES)
c)	Support CAN in their efforts to beautify the area.
<b>Core service: Monitoring and Evaluation: Implement a monitoring and evaluation framework to assess the impact of social development initiatives.</b>	
a)	Regularly review the effectiveness of programs and adjust strategies based on feedback and outcomes.
b)	Ensure transparency and accountability in the allocation and utilisation of social development funds.

**b. Area Within the Proposed Boundaries of the Sondal CID**

This proposal holistically covers the entire area of the Sondal CID since social upliftment has a broad community impact.

**c. Total Estimated Costs of These Services and Projects**

	2026/27	2027/28	2028/29	2029/30	2030/31

**d. Allocation of Resources**

All areas of the Sondal CID will be served on an equal basis to the extent that the services in question are relevant.

**e. Alignment with the Municipality’s IDP and with Section 22(4) of the MPRA**

The Social and Economic Development sections of this plan are consistent with the municipality's IDP (2022-2027 edition) and with section 22(4) of the Local Government: Municipal Property Rates Act, No. 6 of 2004 (the “MPRA”) as shown in the table below.

SOCIAL ECONOMIC DEVELOPMENT			
CID PROGRAMMES	IDP PRIORITIES/ FOUNDATION	IDP OBJECTIVES	IDP PROGRAMMES
Cleaning, Environment & Social Development	FOUNDATION: <b>A MORE SPATIALLY INTEGRATED AND INCLUSIVE CITY</b>	OBJ 15: A more spatially integrated and inclusive city	15.1 Spatial integration and transformation programme
			15.2 Social inclusion and well-being programme

### 13. Financial Impact of the CID

The Sondal CID is funded through additional property rates levied on all rateable properties within the defined CID area. This funding mechanism aligns with the City's policies on City Improvement Districts and ensures that all funds collected are specifically used for improvements within the Sondal CID.

**Budget allocation per Portfolio:**

• Public Safety	39.0%
• Cleansing Services	9.2%
• Environmental Upgrading & Urban Maintenance	9.1%
• Social Upliftment	3.4%
• Employee Related	11.0%
• General Expenditure	6.7%
• Capital Expenditure	14.1%
• Depreciation	1.7%
• Repairs and Maintenance	2.8%
• Contribution to the Rolling Bad Debt Reserve	3.0%

#### a. Budget Creation and Management

At the establishment stage, a proposed 5-year budget is set up to address the needs analysis of the CID over this period. Once established, the CID management body has the opportunity to revise the annual budget to align with the evolving needs analysis of the CID. This budget is subject to approval by the City and must align with the overall objectives outlined in the five-year business plan of the CID. The budget includes costs for supplementary services, administration, and any contingencies. Refer to Part C for the detailed 5-year budget.

## **b. Funding Through Additional Property Rates**

Funding for the Sondal CID is derived from additional property rates, calculated as a percentage of the municipal valuations of properties within the CID boundaries. These rates are collected by the City and then disbursed to the CID to finance its operations and projects. The rate is determined annually based on the approved budget and is adjusted to reflect any changes in property valuations and the financial needs of the CID. Refer to the *Additional Rate* section below for further detail on how the rates are determined.

## **c. Exemptions and Adjustments**

Property owners, such as pensioners, who qualify for full or partial rates relief from the City will be exempt from paying the additional CID rates. It is incumbent on property owners to apply for such exemptions as per the City's Rates Policy. In accordance with the City's CID Policy, the CID additional rate will be capped at 25% of the applicable municipal rates rate on any rateable property in the CID area at the establishment phase.

## **d. Financial Provisions**

A portion of the funds collected (3%) is retained by the City as a rolling bad debt provision, which is kept in a ring-fenced account for the Sondal CID. This provision is compared with the arrears as at the end of the financial year. When the latter is less than the provision for bad debts, 75% of the difference is paid to the Sondal CID as per a Finance Agreement concluded between the City and the Sondal CID.

## **e. Approval and Oversight**

The budget and financial management of the Sondal CID are subject to rigorous oversight and approval processes involving both the CID board and the City, ensuring transparency and adherence to legal and financial standards. This governance structure supports the CID's commitment to enhancing the community's quality of life and economic vitality.

## **f. Budget and Rate Escalations**

The annual budget and anticipated annual rate adjustment is outlined as follows. As demonstrated, the budgeted annual rate adjustment is targeted to fall within the 3-6% inflation target set by the South African Reserve Bank over the 5-year term.

Year	Total Expenditure (Rand)	Percentage change in annual rates requirement
1	8,452,205	-
2	8,828,769	+ 4.5%
3	9,176,366	+ 3.9%
4	9,593,948	+ 4.6%
5	10,091,168	+ 5.2%
<b>Average annual rate increase</b>		<b>+ 4.5%</b>

The CID By-Law and CID Policy allow for a differentiation in tariffs for the different types of properties and as such a residential and non- residential additional property rate is applicable in the Sondal CID.

**Illustration of CID Additional Rate Calculation (Year 1) – Residential**

A residential property owner can calculate the budgeted monthly additional rate for their property by applying the additional rate factor detailed below and their property value as detailed in Annexure E.

Additional rate: R0.001151  
 Median property value: R3,560,000 (for illustration)

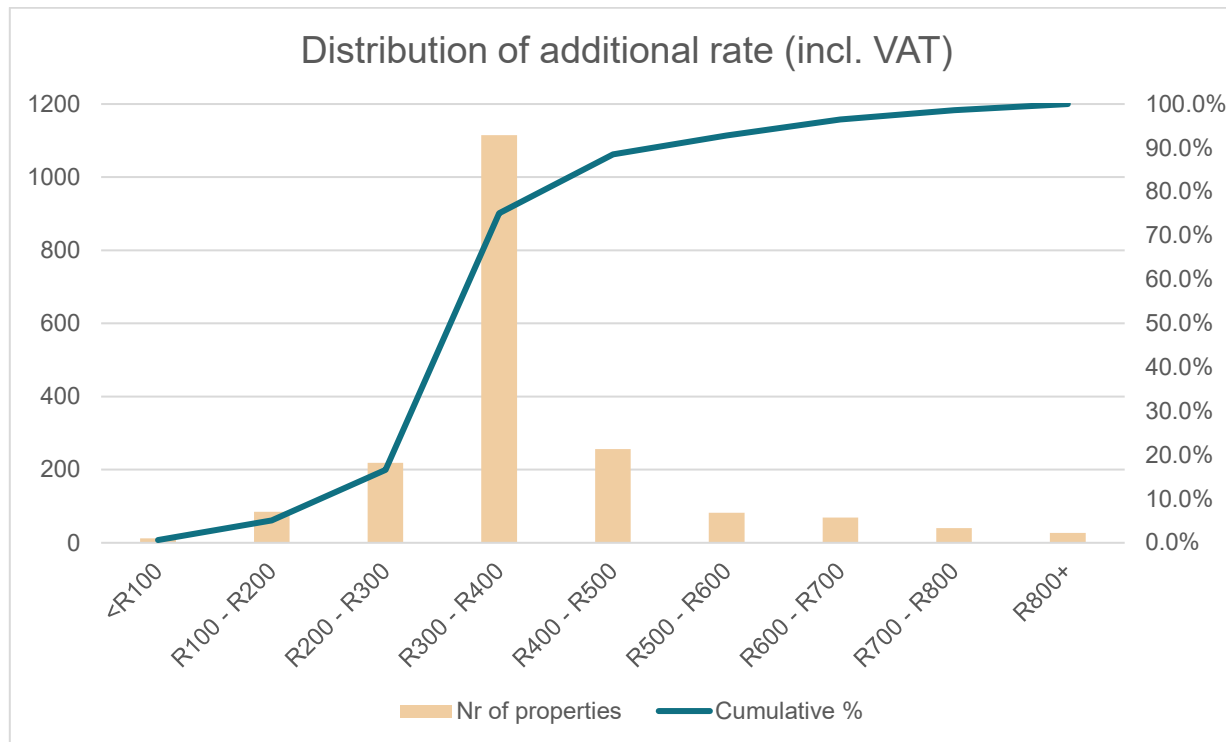

Calculation of monthly rate:  $R0.001151 \times R3,560,000 \times 15\% \text{ (VAT)} \div 12 \text{ months}$   
 = R392.68 per month from July 2026  
 \* Adjusted for inflation, this is equivalent to R350 at the date of this business plan

**Illustration of Monthly Additional Rate Distribution**

The following chart illustrates the distribution of monthly additional rates per property in Year 1, separated into bands of the budgeted monthly cost. See *budget and rate escalations* section above for details of future years.

The following are the key insights illustrated in the chart:

- The majority of residents (60%) will pay between R300 and R400 per month.
- 75% of residents will pay less than R400 per month.
- 90% of residents will pay less than R500 per month.
- 1% of residents will pay more than R800 per month, with 27 properties in the >R8.2 million valuation tier.

### g. Allocation of budget

The chart below illustrates the allocation of the budget per category over the 5-year term.

## 14. Proposed Management Structure

### a. Company Structure

A non-profit company (NPC) will be registered in accordance with the Companies Act and will comply with all the relevant requirements of the Companies Act.

The NPC structure will consist of a Board of Directors, Members, a Company Secretary, and an External Auditor.

The Sondal CID will adopt a Memorandum of Incorporation as prescribed by the City of Cape Town (the "City"), which has been appropriately customised for NPCs registered to serve CIDs.

The NPC will be registered for Income Tax, however the income received from the additional rates will be exempt from Income Tax under S10(1)(e) of the Income Tax Act. The NPC will also register as a VAT vendor and will pay VAT on income received from additional rates and claim VAT on qualifying expenditure.

### b. Members

Any property owner within the Sondal CID who is liable for the additional rate can apply to become a member of the Sondal CID NPC. Membership cannot be denied, is available at no cost, and has no liability attached to it. Members will have voting rights at the Annual General Meeting ("AGM").

### c. Board of Directors

The Sondal CID will initially be governed by an inaugural board appointed for the first six months, which is initially expected to comprise of members of the Steering Committee.

Subsequently, within six months of incorporation a Members` Meeting will be held to elect a Board of Directors . The Board's composition will include property owners within the Sondal CID, and a councillor appointed as an observer (without voting rights) by the Executive Mayor, ensuring alignment with city governance.

The Board will have the authority and responsibility to implement the business plan. Each Board member will oversee a specific portfolio relevant to the Sondal CID's objectives, such as:

<b>Chairman</b>	Provides overall direction and chairs meetings.
<b>Finance</b>	Manages budget and financial reporting.
<b>Public Safety</b>	Oversees security measures and liaises with local law enforcement.
<b>Cleaning and Maintenance</b>	Ensures cleanliness and upkeep of the area.
<b>Environmental Development</b>	Focuses on sustainable development and environmental improvements.
<b>Social Development</b>	Addresses social issues and community welfare.

Board members will serve without remuneration. The Board may co-opt additional directors when a specific skill is required or establish committees under leadership of a director to advise the Board on projects or programmes.

Any deviations from the business plan will require formal board resolution, supported by the members' meeting quorum as defined in the MOI (Memorandum of Incorporation) guidelines.

#### **d. Company Secretary**

The Board of Directors will appoint a Company Secretary. The primary role of the Company Secretary will be to ensure the smooth administration of the Sondal CID in relation to compliance with statutory and regulatory requirements. They will be responsible for the efficient management of board meetings, including the preparation and distribution of meeting agendas, the accurate recording of minutes, and the upkeep of official records.

The Company Secretary will also play a pivotal role in ensuring that decisions of the Board are implemented in compliance with the legal requirements under the Companies Act and other relevant legislation.

The Company Secretary's duties will include overseeing the organization of the Annual General Meeting, ensuring that elections are carried out properly, and that all legal and procedural requirements are met for the presentation of financial statements and reports to the members.

Given the critical nature of these responsibilities, the Company Secretary must have specialised knowledge and experience, and therefore may be remunerated for their services as a service provider to the Sondal CID.

This approach underscores the commitment of the Sondal CID to professional governance and operational excellence, ensuring that its management practices meet the highest standards of accountability and compliance.

### **e. Manager and Service Providers**

A manager will be appointed to handle day-to-day operations, including the management of service providers. The manager will be a professional CID management company that has experience in managing other CIDs to ensure the efficient and dedicated execution of the business plan's initiatives. The CID management company will be appointed following a competitive bid process. The manager will be accountable to the Board of Directors under a Service Level Agreement.

It was concluded that appointing a professional CID management company, as opposed to hiring a CID manager employee, to manage the operations of Sondal CID would lead to the most optimal solution due to the following factors:

- The cost of both options is similar, however a CID management company has far more extensive operational and support staff when compared to concentrating all the diverse responsibilities in one person.

- Reduction of complexity and risks associated with the Sondal CID hiring a direct employee in relation to labour law, employee performance, and other compliance matters.
- The CID's operations will not be impacted by a CID manager employee being on sick and annual leave, and there is also greater accountability for a CID management company under its contract with the CID than is generally possible with an employee.
- A CID management company owns and maintains a variety of machinery and equipment that is shared between CIDs that are managed which would be unaffordable for individual CIDs. There are significant benefits of scale that flow through to the CID.
- The wealth of experience that a CID management company has will ensure optimal operating efficiencies, fewer mistakes, and a reduction in risk. The administrative expertise of a CID management company is beneficial in preparing for the Annual General Meeting, annual reports, meeting minutes and ensuring that the bookkeepers are provided with all necessary supporting documentation to ensure books are kept in good order.

Major service providers to the CID will be selected and appointed by the Board after thorough due diligence has been performed to ensure the suitability and competitiveness of the relevant service providers' proposals. The processes undertaken and decisions made by the Board will be recorded in the minutes of board meetings.

Minor and ad-hoc service providers may be appointed by the manager in accordance with a board-approved procurement policy.

## **f. Financial and Performance Reporting**

The Sondal CID will adhere to stringent financial and performance reporting standards:

- Monthly income and expenditure reports will be tabled at Board meetings and forwarded to the City.
- The CID's annual budgets and implementation plans will be approved at the AGM and submitted to the City.
- Accounting and auditing services will be procured through competitive processes to ensure transparency and integrity.

- A financial statement compiler and IRBA-registered external auditor will be appointed at the AGM. Annual Financial Statements will be audited and submitted to the City and members by 31 August of each year.
- The Board's performance, in line with the Business Plan, will be monitored by members, the community, and the City.
- An annual report will be prepared and submitted to the Sub-Council and CID Branch of the City.

### **g. Inclusivity and Communication**

The Sondal CID will prioritize inclusivity and transparent communication:

- Public participation will be encouraged in the first half hour of Board meetings.
- Information such as agendas, notices, and minutes of AGMs will be published on the CID's website to keep the community informed.
- Special emphasis will be placed on engaging with all stakeholders, ensuring a comprehensive approach to community development and improvement.
- An anonymous feedback function will be added to the CID's website to allow members of the community to provide anonymous feedback or tip-offs to the Board, should they wish to.

## **15. Permissible Amendments to the Business Plan**

If, at any time, it was decided that the geographical boundaries of the Sondal CID needed to change, then such change would need to go through a formal process as required in terms of section 26 of the CID By-law.

If additional services are required, stemming from collaboration with City departments, which are not specified in the motivation report but deemed enhanced or supplementary municipal services, the business plan can be amended without further consent by submitting a request to the City in terms of section 25 of the CID By-law as long as it is not material.

## Proposed Establishment of Sondal Improvement District

\*\*\* Explanatory note 1: This template serves as a guide for steering committees when compiling their proposed public participation plan for approval by the Executive Director as contemplated in section 6(2) of the CID By-law. The template provides examples of a wide range of notification and consultation methods that may be employed. The steering committee should identify methods that would be both meaningful and cost-effective, taking into account the particular characteristics of the local community of the proposed CID. Where the proposed methodology deviates from any mandatory requirements in terms of the By-law, the steering committee must motivate such deviation to Sub-Council, NGOs and any other focus groups the program.

\*\*\* Explanatory Note 2: "local community" in relation to a CID-

means the body of persons comprising individuals falling under one or more of the following categories –

- (a) property owners in the district, irrespective of whether or not they will be liable for paying the additional rate;
- (b) residents of the district;
- (c) tenants and body corporates in the district;
- (d) any civic organisations and non-governmental, private sector or labour organisations or bodies which are involved in local affairs in the district affected by the proposed improvement or upgrading of the district.

# 1. EXECUTIVE SUMMARY

---

A Steering Committee (SC) has been established to investigate whether the subject area would benefit from a City Improvement District. A requirement of the process is an Urban Management Survey, the results of which are set out herein and which will be used to inform a Business Plan compiled by the Steering Committee and presented to the community at an upcoming Public Meeting.

The survey was completed by 421 respondents – where two or more people at the same address completed the survey the duplicates were removed bringing the total to 397 responses. 4.78% of the 397 responses were from a random sample of people living outside the area, but passing through often, bringing the total responses from residents down to 378. The minimum requirement was 372 responses. Of the 378 responses from residents 92.59% were from property owners, 2.12% from owner representatives and 5.29% were from residents renting a property in the area. 28.8% of residents have been living in the area for more than 20 years; 28.3% of residents have moved into the area during the last five years; and the remainder between 5 to 20 years.

The overall perception of the area is good and the residents are happy to stay in the area. There is no overwhelming desire to leave the area. The area is also seen as a generally welcoming area which is well maintained. There is also a general perception that the municipal services in the area are fair to good.

Where safety is concerned there is a perception that the overall safety in the neighbourhood is fair to good. Approximately 55% of the respondents have been victims of crime or have a friend in the area that has been a victim of crime. Some 86% of the respondents have spent money on improving their private security and this is very evident when walking through the neighbourhood.

A concern is that 60% of the respondents who view the general safety in the area to be good (when walking through the area unaccompanied) would not allow their children to roam the streets or walk to school unaccompanied. This is indicative of their true concern regarding the public safety situation. The children are generally confined to their own homes. This is in fact noticeable when walking through the area. If the children are outside their parents are often close by.

Homelessness was found to be a significant concern amongst the respondents. Some 85% of the respondents indicated it to be a concern. A very high percentage (98.5%) of respondents indicated that the presence of homeless loitering contribute to crime and harassment as well as a decrease in cleanliness in the area.

A majority of respondents (77.5%) support the establishment of a City Improvement District, whereas 13.85% were neutral and only 8.56% respondents indicated that they would not support the establishment of a CID.

## 2. BACKGROUND

---

Housebreaking, burglary and petty crime have become more common in the neighbourhood in recent years, along with increasing vagrancy, substance abuse and the social and other accompanying problems.

A group of concerned residents have formed a steering committee (SC) to determine the viability and acceptance of establishing a City Improvement District (CID) within the area indicated on the map below (Valmary Park, Vygeboom, Sonstraal, Amanda Glen, portion of Eversdal and Eversdal Heights).

In accordance with the relevant by-laws and policy of the City of Cape Town (CoCT):

- The SC met with relevant CoCT officials to register itself and confirm the boundaries of the proposed CID.
- CoCT confirmed that all members of the SC are in good standing with the City and that the rates collection ratio for properties within the boundaries of the proposed CID exceeds 95% over the past 12 months.
- CoCT provided the SC with a database of ratepayers in compliance with the Protection of Personal Information Act.
- An Urban Management Survey (UMS) was compiled by the SC and approved by CoCT. This urban management survey is a study completed with the goal of collecting opinions / concerns about various issues. The results of which can tell the steering committee what residents and visitors think of public safety and other matters. This type of data is critical to helping the steering committee to understand the area's strengths and weaknesses and identifies focus areas where supplementary municipal services are required.
- As set out in further detail below, the UMS request and website link was distributed by the SC to all property owners via community Whatsapp groups, emails and a newspaper article.

This document sets out the results of the UMS, which will inform the Business Plan for the proposed CID. In due course, the Business Plan will be presented at a Public Meeting, and must be supported by no less than 60% of the property owners in the CID area as well as the City of Cape Town for the CID to be established.

The borders of the proposed CID are indicated on the map below.

### 3. METHODOLOGY

---

The Municipal by-laws regarding CIDs require that a UMS be conducted on a sample consisting of no less than 20% of Additional Rate Payers (ARPs). With 1,861 ARPs in the subject area, a minimum of 372 UMS responses is required.

The UMS was conducted online at <https://sondal-cid.org/>, with invitations to complete the survey distributed via community Whatsapp groups, emails to all email addresses (13 October 2023) on the property database provided by the City as well as a newspaper article in the Tygerburger (18 October 2023). The survey remained open for completion from 21 September 2023 to 3 November 2023. Regular reminders were posted on various community WhatsApp groups.

## 4. RESPONSES AND DEMOGRAPHICS

The survey was completed by 421 respondents – where two or more people at the same address completed the survey the duplicates were removed bringing the total to 397 responses. 4.78% of the 397 responses were from a random sample of people living outside the area, but passing through often, bringing the total responses from residents down to 378. The minimum requirement was 372 responses. Of the 378 responses 92.59% were from property owners, 2.12% from owner representatives and 5.29% were from residents renting a property in the area. 28.8% of residents have been living in the area for more than 20 years; 28.3% of residents have moved into the area during the last five years; and the remainder between 5 to 20 years.

## 5. FINDINGS: SUMMARY

---

In summary, the response of residents to the UMS paints a picture of a community that is very concerned about the rising level of homelessness in the area. Although the majority does not feel unsafe as such, they strongly support the expansion of camera surveillance and dedicated security services for 24/7 camera monitoring and patrolling. The residents are also somewhat concerned about a decline in public service delivery, overgrowth and cleanliness.

A large majority of respondents supports the idea of collaboration with NGOs to positively deal with social matters and provide support to the homeless, abused women and children, education and others (86%).

The greater part of respondents (77.5%) support the establishment of a City Improvement District, whereas 13.85% were neutral and only 8.56% respondents indicated that they would not support the establishment of a CID.

The graphical results from the survey are provided in the pages that follow. Complete details of all questions and responses/comments, with analysis by suburb, can be found in the accompanying addendums.

## 6. FINDINGS: OVERALL PERCEPTIONS

Has the character of the area changed over the period that you have been here?

As a resident what is your overall perception of the area / neighbourhood?

**What is your overall impression of the municipal services in this area / neighbourhood?**

## 7. FINDINGS: SECURITY AND SAFETY

As a resident / property owner how would you rate the overall safety situation in this area / neighbourhood?

When walking unaccompanied in the neighbourhood what is your perception of your safety?

**If your answer is Good or Excellent to the previous question, would you let your children roam the area, play in the streets or walk / ride bicycle to school unaccompanied?**

**Do you feel safer during the day than at night?**

### Is the area too dark at night?

### Camera alerts and monitoring, together with patrolling (24/7 or all hours) should be carried out (conducted) by:

**Are you aware of community safety & upliftment projects in your area (e.g. neighbourhood watches, MES etc)?**

## 8. FINDINGS: CRIME

Are you aware of the fact that Armed Response companies only has a legal commitment and are legally binded only to their clients propriety/premise with no obligation to engage anyone in a public space?

Were you, or someone in your circle of friends that live in the area the victim of crime (in the area) in the last 10 years?

**Have you spent money on improving your own private security during the above-mentioned period (e.g. upgrade of alarm system, built a wall or fence around property, etc.)?**

**Do you believe (or are you of the opinion) that the cameras that were installed in the area made a positive contribution to the safety in our area?**

**Would you support the expansion of the camera surveillance infrastructure to include open areas like the parks, etc.?**

**Do you believe there is sufficient visible policing in our streets?**

**Would you support the improved monitoring of movement into, and out, of the neighbourhood?**

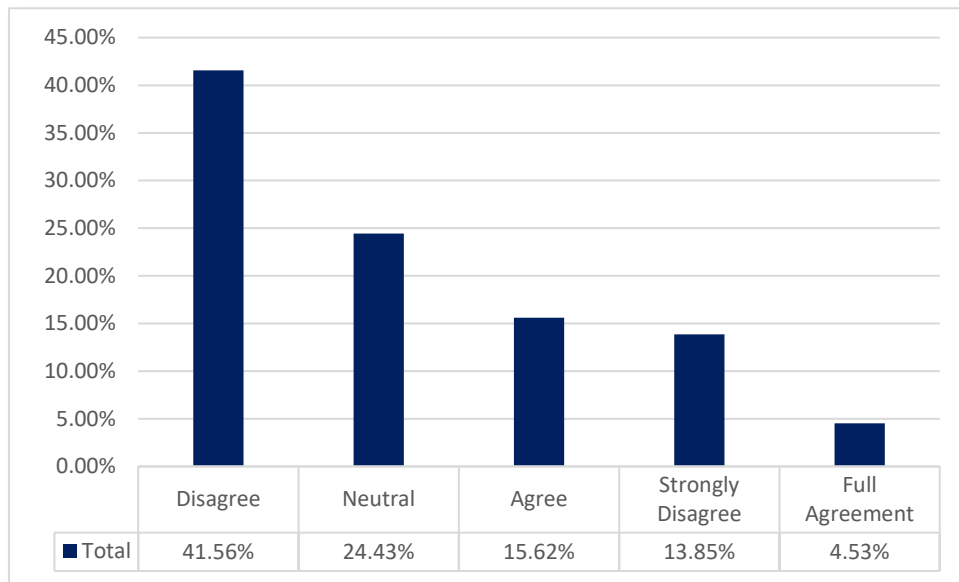

**Please rate each of the following statements to describe your general view regarding safety and security of our area:**

**a) Safety and security does not concern me I proverbially sleep with the doors open.**

Please rate each of the following statements to describe your general view regarding safety and security of our area:

b) I am concerned but it is not bad as some make it out to be - the status quo can remain as it is at the moment.

Please rate each of the following statements to describe your general view regarding safety and security of our area:

c) I am concerned and would like to see more measures taken to improve public safety and security.

**Do you feel there is a need for additional solar lighting during loadshedding?**

## 9. FINDINGS: PARKS AND OPEN AREAS

Do you make use of the parks including Vygeboom & Sonstraal dam for recreational purposes?

Do you think the amenities around the parks including Vygeboom & Sonstraal dam can be improved?

**What is your perception of the condition of the Vygeboom dam or Sonstraal dam?**

**Do you make use of the Kuilsriver corridor for recreational purposes?**

### How would you rate the overall condition of the parks and open areas?

### Would you make use of a fenced dog park in the area?

**Would you or your children make use of a bike park in the area?**

**Do you think there is sufficient public litter bins in the area and is cleaned out regularly?**

## 10. FINDINGS: TRAFFIC

Is obscured sight distance and road traffic signs due to overgrowth a concern to you?

Is feint roadmarkings a concern to you?

**Is poor road surface (potholes) conditions a concern to you?**

# 11. FINDINGS: CLEANLINESS

Is the overgrowth on some sidewalks a concern to you?

Is the lack of pruning of trees in the public areas and sidewalks a concern to you?

**Are you satisfied with how the municipality currently maintain the parks & public areas?**

**Are you satisfied that the verges and the channels next to the streets are sufficiently maintained?**

**Are you satisfied with the general cleanliness of the area (e.g. littering, etc.)?**

## 12. FINDINGS: SOLID WASTE

Is bin scratching on bin days a concern to you?

Are you satisfied with the current level of recycling (i.e. one green bin)?

**Would you like to see a greater degree of recycling (i.e. plastic, compost, garden refuse, paper, tin, glass in separate bins)?**

## 13. FINDINGS: SOCIAL ISSUES

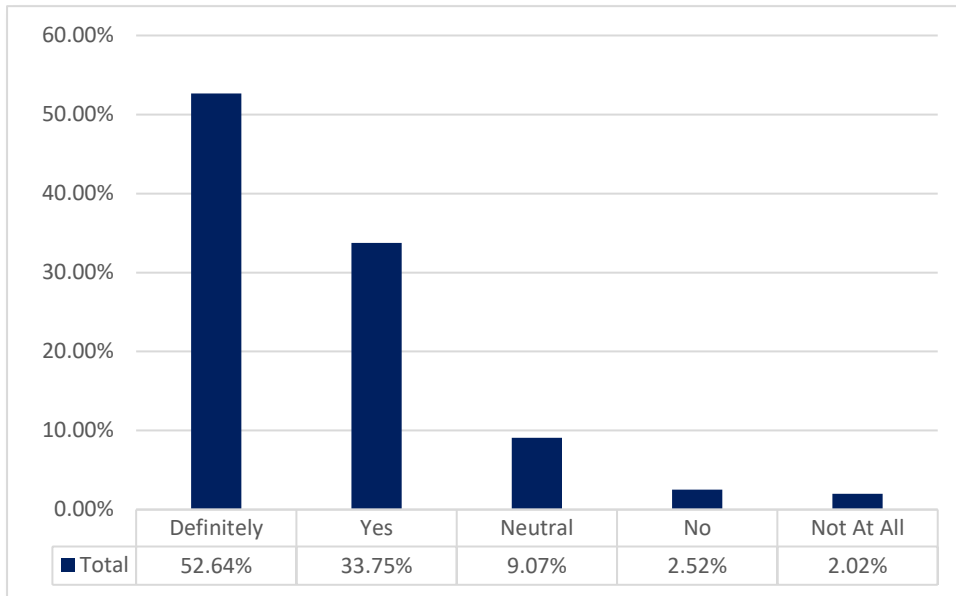

Are homeless individuals a source of concern in the area?

If your answer is Yes or Definitely to the previous question, do you believe the presence of homeless loitering contribute to crime and harrassment as well as a decrease in cleanliness in the area?

**Would you like to see that our area support the collaboration with NGO's to positively deal with these matters i.e. support some of their programmes that deal with the homeless.**

**Would you like to see that our area support the collaboration with other NGO's to positively deal with other social matters in our immediate surroundings (such as the support of NGO's for Abused women and children, education and other)?**

# 14. PRIORITISATION

Place the following categories in the order of importance to you:

# 15. FINDINGS: SPECIAL RATES AND BUSINESS PLAN

To what extent do you agree with the following statement: All property owners should share responsibility for ensuring a safer neighbourhood.

To what extent would you prefer to get involved to uplift the area you live in (based on security, social responsibility, cleanliness and parks).

**If a business plan that carries your favour is presented would you support the establishment of the Sondal Community Improvement District (CID)?**

## 16. ANNEXURE A – EMAIL (13/10/2023)

---

### Dear Property and Business Owners

A group of concerned residents have formed a steering committee to determine the viability and acceptance of establishing a City Improvement District within the area indicated on the attached map (Valmary Park, Vygeboom, Sonstraal, Amanda Glen, portion of Eversdal and Eversdal Heights).

**All we kindly ask of you at this stage is to complete the questionnaire at the following link : <https://sondal-cid.org/>** (it will only take 15 minutes of your time). Once we have captured this information and done the analysis, we will have a better understanding of our collective needs and can plan accordingly to move on to the next step. All submitted information will be kept confidential.

### What Is a City Improvement District?

A City Improvement District (CID) is a clearly defined geographical area in which property owners pay additional property rates to fund supplementary municipal services to improve or upgrade that specific area as described in a business plan. CIDs are also known as Special Rating Areas.

Supplementary municipal services typically include:

- additional public safety;
- cleansing services;
- urban maintenance;
- upgrading of the environment; and
- social upliftment.

### What are the benefits for the Community and Why Do We Need to Complete This Urban Management Survey?

By combining their resources in a CID, the community can enjoy the collective benefits of a well-managed area, a shared sense of communal pride, safety and social responsibility, and access to joint initiatives such as waste recycling, energy-efficiency programs, etc.

We are working closely with the City of Cape Town in this regard, and the first step in the process is to gain a better understanding of the specific problems we are all experiencing. This urban management survey is a study completed with the goal of collecting impressions / concerns about various issues. The results of which can tell the steering committee what residents, business owners and visitors think of public safety and other services. This type of data is critical to helping the steering committee to understand the area's strengths and weaknesses and identifies focus areas where supplementary municipal services are required.

Once we have captured this information and done the analysis, we will have a better understanding of the community's needs. This is simply the first step in many, and there will be in-depth consultations

with all parties at a later stage. By completing this survey, you are not giving your vote for or against the CID. It is simply an information gathering exercise.

Should you have any further questions, please visit the website, <https://sondal-cid.org/>.

Kind regards

**Steering Committee**

BEST OF SEVERAL MODELS OF CIVIC INVOLVEMENT MOOTED

# Residents want a CID

**A** survey is currently underway to determine the needs of Sonstraal residents when it comes to establishing a Community Improvement District (CID) in the neighbourhood.

This is the first step by the steering committee to start a CID in Sonstraal. The steering committee was elected after a group of concerned homeowners from the neighbourhood came together in August last year to discuss what can be done to improve the safety and the wellbeing of their community.

## BEST MODEL

"Several models were looked at, but most of these meant that only a small percentage of homeowners contribute financially, but all will benefit from it," explained Louise Buys, chair of the steering committee.

"It was decided that the best model to get all to contribute and benefit from the work that will be done would be a CID."

There are already 50 active CIDs in the City of Cape Town and many more in the initiation phase. In the Northern Suburbs Vredeloof and Welgemoed are well-established CIDs.

The group contacted concerned homeowners in neighbouring suburbs and six people formed the steering

The suggested Sondal CID includes about 2 000 residences in Sonstraal, Valmary Park, Vygeboom, Eversdal Heights, parts of Eversdal (north of Eversdal Road) and Amanda Glen.

**"A CID... manages additional funding and service delivery**

- Louise Buys

"A CID is a non-profit company that manages additional funding and service delivery in a specific area," Buys explained.

"It gives the homeowners within the CID the opportunity to decide what will be done with the additional funds they contribute, which will be spent only within the CID.

"The CID gets a mandate from its members to manage specific functions to improve the community, such as safety, improvement of green spaces, cleaning and social responsibility."

## SURVEY

The steering committee is currently busy with a survey to determine the needs of the community.

"This is the first step in a long process of about 24 months to establish the Sondal CID," Buys said.

"The results of the survey is of critical importance to assist the committee to establish the strong and weak points of the area, and to identify focus areas where additional municipal services are

"We ask of every single homeowner in our area to give their feedback on our website and complete the survey."

■ Visit <https://sondal-cid.org/> to complete the survey.

<b>SONSTRUAL</b>	Comparatively to other areas, we are relatively safe. However it is declining and a growing concern. Concerned about non residents roaming the streets during day time. Concerned about vagrants frequenting the area on refuse collection days. Declining - due to vagrants. Due to large investments by residents in cameras and patrolling. Excellent safety. We have a number of security companies that are competing with one another, which increases security company activity. We would be worse off with a single security company. I am happy to contribute to additional LPR cameras, etc. for the I qualify my choice on this question as being "fair to good" Kids go to Gene Louw but wouldn't let them walk alone to school, which is a pity to feel that way. Now a community initiative. State not up to the task. Thanks to the NHW (Kendal Road) and Armed Response , security is under control. NO LAW ENFORCEMENT presence at all! The community does stand together and there are various security groups patrolling There are incidents Vagrant walking freely through the area. There were break ins through roofs. We only have security provided by private security firms and neighbourhood watches run by residents.	1 1 1 1 1 1 1 1 1 1 1 1 1 1

<b>EVERSDAL HEIGHTS</b>	Considering that we live in SA. But relatively good. We have not had any incidents. Had number of issue with people climbing over our wall and stealing whatever they can find. I currently live on a main road and would appreciate a barrier between the road and ours. Our street becomes the walkway for all foot traffic which is not ideal. I take responsibility for my own safety and do not rely on SAPS or Security Companies. Not easy in this country to get to the excellent position. Subjectively, patrolling is less visible and the vehicles are parked in predictable places. No overhead neighbourhood cameras Thanks to the WhatsApp groups - very helpful but I won't let my kids walk by themselves The bergies in central durbanville is really giving durbanville a bad name. It never used to be like that. Especially the area around KFC Durbanville, police station etc. It is since covid..... <b>SONSTRAAL</b>	Again qualifying my choice I would say and consider the underlying assessment is that preferably we should all have the awareness that walking alone is not the best or wisest choice and should always be carefully observant of everything and everyone around. As a woman, I wouldn't walk alone. But would not allow my wife or children to be alone outside at night. But would not walk around after dark or allow my family to do so. Depends on the time of day I would especially not let my daughter walk alone in the neighbourhood. Much more gates, high walls. Must always be vigilant, especially bin days as mentioned. There has been cellphone grabbing nearby but doesn't happen often. My elderly mother in law walks every day and has always been safe Private security is visible. Police is only reactive. Other than that the local authority does not play any role in our safety The perception is unsafe due to a few incidents where females attacked by people in cars. This alhas a lot to do with the vigilance of residents. With the cameras we have in the area and the variety of security companies, I feel very safe. Much safer than any other neighbourhood in South Africa.	1 1 1 1 1 1 1 1 1 1 1 1

<b>AMANDA GLEN</b>	30 odd years ago our kids played in the street, but I'm not sure I would let my grandchildren play unaccompanied now. Absolutely not. There are regular reports of children (and domestic workers) being attacked to rob their mobile phones in the area. Kids too young, below 9 yo. My teenagers yes, but not kids under 10. Traffic is also a consideration, not only unwanted elements. No matter how safe I feel in my neighbourhood I will never let my child walk around unaccompanied - it is after all only a child. Nobody stops at stop streets and cars as well as busses don't look out for bicycles Only because of people's disregard for traffic rules - not something that a CID will improve. Only if they are bigger, currently 2 & 9 years old The problem is people from within our neighbourhood driving like maniacs when late for school or in a hurry somewhere else. Traffic in the morning does not allow for safe bike riding. When they are old enough quite possibly I would.	1 1 1 1 1 1 1 1 1 1 1

<b>SONSTRAAL</b>	Actually lots of repairs happening After rain only. Although residents should take the responsibility to log this with the city, nobody seems to care to do this. At some point people just stop reporting potholes. I am past that point and are thinking fixing it myself or get a private sector company to do that. Everything that I've reported potholes it has been addresses timeously. Thus it getting the necessary attention when reported according to me Generally the road surface is good and potholes fixed quickly Maintenance of streets is a municipal responsibility and not a topic for a private CID Not really an issue. Potholes in our neighbourhood get fixed in record time compared to other areas. The municipality does a great job! AMANDA GLEN	As a runner the sidewalks are where I run. Overgrowth means I have to run in the road. As is the gardening that happens right onto the verge of the road, because the City doesn't maintain the pavements so the residents do, but this has the unintended consequence of no safe space for pedestrians to walk. Most people tend to care for their own piece - the City does nothing for sidewalks Municipality is carrying out a fine job No sidewalk overgrowth. Overgrowth is not a problem, it is the owner who put rocks and plants on the sidewalk that you cannot use it, it that owner how is the problem. Sidewalk should be clear enough to allow pedestrian space. No rocks should be allowed to cover whole path Some personal residences do need a sidewalk cleanup	1 1 1 1 1 1 1
AMANDA GLEN Total		8
SONSTRAAL	But usually owner's neglect Feel there are some areas that do genuinely need attention, but question whether or not the owners of properties where this is excessive could/should take some responsibility to deal with. Home owners should attend themselves. Not really. Happy with how regular the municipality cuts the overgrowth. It never gets nearly as I as in some other neighbourhoods. Pavements: from road there should be a clear 1 meter strip solely for walking. Far too many residents clutter the pavement with plants and trees without any concern for others. Immediately issue an instruction to ALL residents to clear that 1 meter. Grass People should not plant/place obstacles on the pedestrian sidewalks as this causes them to have to walk/jog in the road around it with risks of vehicle accidents.
